

Respirators

9300 Series

The advanced three panel design of the 9300 series makes them easier to breathe through and are not prone to collapse. Being foldable, they offer more convenience than the traditional cup-shape.

Features include a headband which keeps a near constant tension, reducing strap pressure and ensuring a secure fit to the face for a range of head sizes. The unique CoolFlow™ exhalation valve minimises heat build-up making breathing easier and cooler. A soft material is used for those parts in contact with skin. Individually packed to avoid contamination, they have colour-coded straps for easy identification. These respirators are CE marked and meet EN149.

Respirators

Product No	11348/01	11348/02	11348/03	11348/04	11348/05
Suggested uses	Fine dusts	Fine dusts	Fine dusts & water based mist	Fine dusts & water based mist	Fine dusts, water based mist & metal fume
Standard	FFP1S	FFP1S	FFP2S	FFP2S	FFP3S
Nominal protection factor	4	4	12	12	50
Assigned protection factor	4	4	10	10	20
Pack quantity	20	10	20	10	10

9900 Series

Product No	11349/01	11349/02
Suggested uses	Fine dusts & nuisance levels* of organic solvents	Fine dusts & nuisance levels* of acid gases
Standard	FFP1S	FFP1S
Nominal protection factor	4	4
Assigned protection factor	4	4
Pack quantity	20	20

* Nuisance level = below OEL
