

The logo for ZIEGRA EISMASCHINEN is centered in the lower half of the page. It features the brand name 'ZIEGRA' in a large, bold, sans-serif font, with each letter individually outlined. Below it, the word 'EISMASCHINEN' is written in a smaller, all-caps, sans-serif font. The text is contained within a rectangular frame. To the left of the frame, a stylized line drawing of a house with a gabled roof is partially visible. Scattered around the logo are several pieces of clear, irregular ice cubes.

Compact Machines – Remote – Ice maker
Standard and Tropical execution

Why is Chip ice so outstanding?

– 0,5°C ice temperature stands for:

- Quick and long lasting cooling effect.
- No damage due to freeze burn of the goods.
- No freezing together or lumping of the ice.
- Suitable for *all day* storage.
- High cooling effect and energy efficiency.

Superior method:

- Closed water system = better hygiene
- Static evaporator = no refrigerant leaks
- Robust construction = reliable

MacroIce

Pieces of ice up to 9.5 mm thick. It is particularly good for lengthy storage and is excellent for cooling over long periods of time e.g. for transporting fish and for retail displays.

MicroIce

MicroIce consists of small ice pieces with an average size of approximately 5 mm. It mixes well, dissolves and cools rapidly. MicroIce is the most appropriate one for mixing processes and for delicate goods such as fish fillets.

StandardIce

The mix of small and large ice particles guarantees a high degree of cooling with good storage capability – ideal for the bowl chopper and for process cooling.

Compact, plug-in units
